

Release: Referral Data

October 31, 2024

The first release of Referral data goes live in MyHealth Records via My Personal Records on October 31, 2024.

It includes status information as the referral progresses from initial request to completed, after the appointment with the specialist has occurred.

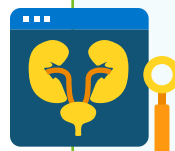

Consult Request Only

Consult request (no advice, and no historical information) will be available.

By Specialty - Urology First

Most urologists in all zones are using eReferral.

By specialty, Urology has the highest percentage of information available to be displayed within MyHealth Records.

Referral Status Examples:

MyHealth Records display (eReferral System status)
